

🌿 Green Startup Funding Opportunity 🌿

Are you passionate about making a difference in plastic waste management? Do you have an innovative idea that could revolutionize the way we handle plastic waste? If so, we invite you to apply for our “Seed Money” startup funding!

Project Name: “Implementation of the Comprehensive Activities for Sustainable Plastic Waste Management”

Age and Leadership:

- Target Age Group: Founder/ Co-founder must be aged between 18 and 35 years.
- Youth Leadership: The start-up should be led by young individuals who are actively involved in the day-to-day operations and decision-making processes.

Focus on Plastic Waste Management:

- Core Mission: The start-up's primary mission and business activities should be centered around innovative solutions for plastic waste management.

Innovation and Creativity:

- Novel Solutions: The start-up must present innovative and creative approaches to addressing challenges in plastic waste management.
- Problem-solving: Solutions should demonstrate a clear understanding of the plastic waste issue and a creative approach to solving it.

Operational Stage:

- Early Stage: Open to green start-ups in their early stages of development (e.g., seed or early funding stages).
- Legal Structure/ Legally Registered: The start-up should be a legally registered entity, ensuring compliance with local regulations.

Team Composition:

For each start-up, a team preferably 03 to 07 young individuals should participate.

- Youth Leadership: At least one founder or co-founder must be within the specified age range.
- Diverse Teams: For other team members, diverse individuals with varied skill sets and backgrounds are encouraged to participate.

Project Scalability:

- Scalability: The proposed solution should demonstrate potential scalability for wider impact in the field of plastic waste management.

Environmental Impact:

- Sustainability Focus: The start-up's activities should emphasize sustainability and have a positive impact on the environment.
- Carbon Footprint: Consideration of the start-up's overall carbon footprint and commitment to reducing environmental harm.

Feasibility and Viability:

- Feasibility: The proposed solution should be technically feasible and operationally viable.
- Viability: A clear business plan demonstrating the economic viability of the proposed solution.

Social Impact:

- Community Engagement: Bonus points for solutions that actively engage with and benefit local communities.
- Educational Initiatives: Additional consideration for start-ups incorporating educational components related to plastic waste management.

Ethics and Integrity:

- Ethical Standards: Start-ups should adhere to high ethical standards in their business practices.
- Transparency: Demonstration of transparency in operations and communication.

Demonstrable Progress:

- Progress to Date: Preference for start-ups that can demonstrate tangible progress or achievements, no matter how small, related to plastic waste management.

Collaboration Potential:

- Collaborative Spirit: Willingness to collaborate with other start-ups, organizations, or experts in the field will receive special consideration.

Communication Skills:

- Communication: Ability to clearly articulate the start-up's mission, vision, and proposed solution.

Ready to make a difference?

Apply now and join the movement towards sustainable plastic waste management.

Together, we can create a cleaner, greener future! ● ♥
